

The New York Cycling Map

The New York Cycling Map was developed to encourage more people to bicycle by identifying a network of the best streets and park paths for cycling, to educate cyclists about their rights and responsibilities as roadway and park users, to inform cyclists about access to mass transit, points of interest and bike shops, and to recognize cycling as a legitimate mode of transportation.

The New York Cycling Map was designed by in-agency staff at the New York City Department of City Planning and Department of Transportation Bicycle Program. The map was funded by the federal Intermodal Surface Transportation Efficiency Act (ISTEA), under the Congestion Mitigation Air Quality (CMAQ) Program.
