

The New York Cycling Map

The New York Cycling Map was developed to encourage more people to bicycle by identifying a network of the best streets and park paths for cycling; to educate cyclists about their rights and responsibilities as roadway and park users; to inform cyclists about access to mass transit, points of interest and bike shops; and to recognize cycling as a legitimate mode of transportation.

The New York Cycling Map was designed by In-Agency staff at the New York City Department of City Planning and Department of Transportation Bicycle Program. The map was funded by the federal Intermodal Surface Transportation Efficiency Act (ISTEA), under the Congestion Mitigation Air Quality (CMAQ) Program.

Street-Smart Cyclist

An approved bicycle helmet can greatly reduce the risk of death or permanent injury in the event of an accident. Look for the CPSC or Snell Memorial Foundation Standard stickers. Cyclists under age 14 must wear a helmet.

The following equipment is required by law: white headlight and red taillight from dusk to dawn, reflectors, working brakes, bell, helmet when under age 14.

Street-Smart Skater

In-line skating is an effective form of low impact aerobic exercise. Wear safety equipment, control your speed and yield to pedestrians. Racing or trick-skating has no place on paths, sidewalks or roadways.
