

New Safety Features!

Over the past 3 years, NYCDOT has built over 200 miles of new on-street bike facilities around New York City. These facilities are designed to increase safety for all road users - cyclists, pedestrians and drivers. Many of the new facilities include cutting-edge design features, putting New York at the forefront of transportation planning and design.

- Parking Protected Bike Paths** - provide a buffer between you and car traffic.
- Bike Traffic Signals** - help eliminate turning conflicts.
- Mixing Zones** - are shared bikelane areas. Stay alert for merging & turning cars.
- "Bike Boxes"** - make you more visible when stopped at a left turn.

For more information about bike safety please go to www.nyc.gov/bikes

 DEPARTMENT OF PARKS & RECREATION
 ADRIAN SINGELI, COMMISSIONER

New York City RULES

- Cyclists must obey all traffic lights and signs.**
You wouldn't run a red in a car; don't do it on your bike.
- Cyclists should yield to pedestrians.**
People crossing with the light have the right of way.
- Cyclists may NOT ride on the sidewalk.**
You don't like cars in the bike lane; don't ride in pedestrian-only areas. (Only children 12 years or younger may ride on the sidewalk.)
- Cyclists must ride in the direction of traffic.**
Drivers aren't looking for you coming at them in the wrong direction.
- Use lights at night.**
White front lights, red tail lights and a bell are required by law.
- Wear a helmet.**
Helmets are like seatbelts; they won't keep you out of a crash, but they might save your life if you're in one. (Helmets are required by law for children 13 years or younger.)

Pedestrians: Stay alert! Look for bikes as well as cars before you cross the street!

A list of New York City's cycling rules can be found at www.nyc.gov/bikes
